

O.R.D.E.R. FRAMEWORK

LMS Module Development Guide

The Path to the 2-Day Work Week

5-Module Course Structure

Linear Gated Tunnel Architecture

Gamification & Badge System

Certificate: O.R.D.E.R. Business Mastery Certified

Course Overview

The O.R.D.E.R. Framework is a comprehensive business mastery program designed for solopreneurs and small business owners who want to transition from being overwhelmed and overworked to running a business that can function without their constant presence. The framework guides learners through a systematic process of auditing their business, building systems, empowering their teams, and ultimately replacing themselves from daily operations.

Course Architecture

This course utilizes a Linear Gated Tunnel architecture where each module must be completed before the next becomes available. This design prevents founder overwhelm by ensuring the business is stable at one level before adding the complexity of the next. Each gate acts as a quality control mechanism, requiring users to submit specific work products rather than just clicking 'complete'.

Module Structure Overview

Module	Letter	Duration	Primary Deliverable
Module 1: Owning Your Clock	O	10 Days	Default Weekly Schedule
Module 2: Review What Works	R	10 Days	90-Day Focus Plan
Module 3: Develop Systems	D	30 Days	Systems Playbook v1.0
Module 4: Educate & Empower Teams	E	21 Days	Weekly Team Rhythm
Module 5: Replace Yourself & Review	R	30 Days	Founder Dashboard

Target Audience

- Solopreneurs looking to scale without burnout
- Small business owners (1-20 employees) feeling overwhelmed
- Founders wanting to transition from operator to owner mindset
- Business owners seeking a path to 4-day and eventually 2-day work weeks

Total Course Duration

Approximately 101 days of structured content with daily micro-learning sessions (15-45 minutes per day). The course is designed for busy entrepreneurs who need to implement changes while continuing to run their businesses.

Module 1: Owning Your Clock

Module Overview

This foundational 10-day challenge helps learners gain control of their time through honest assessment, priority clarification using the Eisenhower Matrix, and structured schedule design. By the end, participants will have freed at least 2 hours per week and established a repeatable weekly schedule that protects their highest-value work.

Module Learning Objectives

- Accurately assess current time usage patterns and identify inefficiencies
- Apply the Eisenhower Matrix to categorize tasks by importance and urgency
- Design an ideal workday structure based on personal energy patterns
- Create and commit to a default weekly schedule with protected time blocks
- Identify and mitigate common interruption patterns that derail productivity

Daily Breakdown

Days 0-1: Baseline Assessment

Objective: Establish an honest picture of current work hours and patterns.

- Complete weekly hours snapshot for each day of the previous week
- Record start times, end times, and total hours worked
- Note significant events that affected the schedule
- Calculate total and average weekly hours

GATE: Baseline Entry - All daily time entries must be completed with numerical values

Day 2: Task Inventory

Objective: Create a comprehensive list of all tasks handled in a typical week.

- List client work activities
- Document team management responsibilities
- Include administrative tasks (email, invoicing, scheduling)
- Capture marketing and sales activities
- Note content and creative work
- Record emergencies and interruptions

GATE: Task Inventory - Minimum 10 distinct tasks must be documented

Day 3: Eisenhower Matrix

Objective: Sort all tasks using the Important/Urgent framework.

- Define Important tasks (revenue, systems, relationships, strategy)
- Define Urgent tasks (time-sensitive demands)
- Place each task in appropriate quadrant: DO NOW, SCHEDULE, DELEGATE, DELETE
- Identify patterns in task distribution
- Recognize tasks that don't require personal attention

GATE: Matrix Completion - All quadrants must contain at least one task, with reflection notes completed

Day 4: Design Ideal Workday

Objective: Build a daily structure aligned with personal energy patterns.

- Identify peak energy times (Early Morning, Late Morning, Early Afternoon, Late Afternoon)
- Assign Creative Work to highest-energy blocks
- Schedule Deep Work during interruption-resistant times
- Allocate Administrative Work around planned interruption blocks
- Designate 90-minute Interruption Block daily
- Reserve time for Growth Planning

 **GATE: Ideal Day Template** - All five time block categories must have assigned times

Day 5: Build Weekly Schedule

Objective: Transform the ideal day into a sustainable weekly structure.

- Create weekly grid with time slots (Early AM through Late PM)
- Place Creative Work in highest-energy slots across all days
- Schedule Deep Work during protected times
- Reserve at least one 2-hour block for non-work life
- Ensure 90-minute daily Interruption & Admin blocks

 **GATE: Weekly Schedule Draft** - Complete grid with all time blocks assigned and at least one non-work block

Days 6-9: Daily Execution & Logging

Objective: Test the new schedule and track actual vs. planned results.

- Run the new schedule each day
- Log planned vs. actual start and end times
- Document what was actually accomplished in each block
- Record interruptions and whether they could have waited
- Note one improvement for the next day

 **GATE: Execution Log** - Four days of completed logs with reflection notes

Day 10: Time Gain & Refinement

Objective: Calculate time savings and finalize the default schedule.

- Compare before and after end-of-day times
- Calculate estimated hours gained per day and per week
- Identify what worked best in the schedule
- Lock in final default weekly schedule
- Sign commitment to the 30-day default schedule

 **GATE: Schedule Commitment** - Signed commitment with calculated time gain (minimum 2 hours/week target)

Module 1 Final Assessment

Question 1: Which quadrant of the Eisenhower Matrix should contain strategic planning and creative work?

- A. DO NOW (Urgent + Important)
- B. SCHEDULE (Not Urgent + Important)
- C. DELEGATE (Urgent + Not Important)

D. DELETE (Not Urgent + Not Important)

Correct Answer: B

LMS Logic: Strategic and creative work is Important but rarely Urgent, so it must be SCHEDULED proactively.

Question 2: What is the minimum time gain target for this module?

- A. 1 hour per week
- B. 2 hours per week
- C. 5 hours per week
- D. 10 hours per week

Correct Answer: B

LMS Logic: The module goal is to free at least 2 hours per week for non-work activities.

Question 3: Why is the Interruption Block scheduled for 90 minutes daily?

- A. To accommodate all meetings
- B. To contain and absorb unexpected disruptions without derailing the entire day
- C. To provide extra lunch time
- D. To fill gaps in the schedule

Correct Answer: B

LMS Logic: Planned interruption time prevents reactive firefighting from consuming the whole day.

Question 4: What is the primary purpose of the baseline assessment on Days 0-1?

- A. To judge productivity
- B. To establish an honest picture of current time usage patterns
- C. To compare with other business owners
- D. To set strict time limits

Correct Answer: B

LMS Logic: You cannot improve what you don't measure. The baseline provides the foundation for all future improvements.

Question 5: When should Creative Work be scheduled in your ideal day?

- A. During any available free time
- B. During your highest-energy periods
- C. At the end of the day when tasks are complete
- D. Only on weekends

Correct Answer: B

LMS Logic: Creative work requires peak mental energy. Scheduling it during high-energy periods maximizes output quality.

Module 1 Badge

Time Master: Awarded upon completion of Module 1 and achieving the 2-hour weekly time gain. Represents mastery of personal time management fundamentals.

Module 2: Review What Works

Module Overview

This 10-day sprint focuses on conducting a comprehensive audit of the business to identify high-profit drivers and eliminate time-wasters. Learners analyze revenue sources, client profitability, time allocation, offers, and lead channels to create a focused 90-day action plan.

Module Learning Objectives

- Analyze revenue sources and identify top clients/projects by financial contribution
- Evaluate clients and projects on both profit AND energy dimensions
- Map time expenditure against value creation to identify time leaks
- Assess offers and marketing channels for strategic focus
- Synthesize findings into a prioritized 90-day focus plan with clear metrics

Daily Breakdown

Phase 1: Revenue & Client Reality (Days 1-2)

Day 1 - Revenue Snapshot:

- Input total revenue for the last 12 months
- Count total active clients
- Identify and rank top 10-15 revenue sources
- Document scope, size, and terms for each major client/project

 **GATE: Revenue Table** - All revenue entries must have numerical values, total must equal or approximate stated annual revenue

Day 2 - Profit & Energy Check:

- Rate each client/project on Profit (High/Medium/Low)
- Rate each client/project on Energy (Energizing/Neutral/Draining)
- Identify 'Sweet Spot' work (High Profit + Energizing)
- Identify problem areas (Low Profit OR Draining)
- Select top 3 types of work to keep if forced to choose

 **GATE: Sweet Spot Identification** - User must identify at least one High Profit + Energizing combination

Phase 2: Time vs. Return (Days 3-4)

Day 3 - Activity Inventory:

- List all weekly activity categories
- Estimate hours per week for each category
- Categories include: Client Delivery, Sales & Biz Dev, Marketing/Content, Team Management, Admin, Firefighting
- Calculate total weekly hours as baseline

 **GATE: Activity Hours** - Total weekly hours must be calculated and sum must be entered

Day 4 - The Value Audit:

- Rate each activity by Revenue Impact (High/Medium/Low)
- Rate each activity by Strategic Impact (High/Medium/Low)
- Identify 'Time Leaks' (activities with Low Impact but High Hours)

- Recognize under-invested high-return activities

 **GATE: Time Leak Acknowledgment** - System flags any activity over 5 hours/week with Low Revenue AND Low Strategic impact

Phase 3: Offers & Channels (Days 5-6)

Day 5 - Offers That Work:

- List all core offers/services with price ranges
- Document volume sold in last 12 months
- Estimate profit level for each offer
- Assign status: Keep, Improve, or Retire
- Select 1-2 offers as best path to growth

 **GATE: Offer Status** - All offers must have Keep/Improve/Retire status assigned

Day 6 - Lead Sources That Work:

- List all lead generation channels
- Track leads and clients from each channel
- Calculate revenue attributed to each channel
- Identify 1-2 best-performing channels
- Select at least one channel to pause

 **GATE: Channel Pause** - User must formally pause at least one underperforming channel

Phase 4: 90-Day Focus Plan (Days 7-10)

Day 7 - Choose Focus Areas:

- Synthesize findings from all previous days
- Select top 3 focus areas for next 90 days
- Ensure alignment with Sweet Spot work

 **GATE: Three Focus Areas** - Exactly three focus areas must be defined

Day 8 - Stop, Start, Double Down:

- Define 2-3 things to STOP doing
- Define 2-3 things to START doing
- Define 2-3 things to DOUBLE DOWN on

 **GATE: Action Lists** - All three categories (Stop/Start/Double Down) must have at least two items each

Day 9 - Success Metrics:

- Define 1-2 metrics for each focus area
- Set specific 90-day targets for each metric
- Ensure metrics are measurable and actionable

 **GATE: Metrics Definition** - All three focus areas must have defined metrics with numerical targets

Day 10 - The Commitment:

- Review and finalize complete 90-Day Focus Plan
- Sign and date the commitment document
- Upload finalized plan to unlock Module 3

 **GATE: FINAL MODULE GATE** - Signed 90-Day Focus Plan must be uploaded as PDF or screenshot

Module 2 Final Assessment

Question 1: Based on your audits, which type of work represents your 'Sweet Spot'?

- A. High-volume, low-margin tasks that keep the lights on
- B. Specialized projects requiring unique expertise that pay well and feel rewarding
- C. Legacy projects that are draining but familiar
- D. Any work that generates revenue regardless of effort required

Correct Answer: B

LMS Logic: The Sweet Spot is defined as High Profit + Energizing work that leverages unique expertise.

Question 2: Looking at your Time vs. Value inventory, where is the primary bottleneck located?

- A. Client Delivery (Doing the work)
- B. Sales & Business Development (Getting the work)
- C. Admin & Operations (Managing the work)
- D. Depends on individual analysis results

Correct Answer: D

LMS Logic: This answer is personalized based on Day 3-4 data and automatically populates the 'Workflows to Systemize' list in Module 3.

Question 3: Which activity type should appear on your STOP list based on the framework?

- A. High-value strategic planning
- B. Firefighting and low-impact admin tasks
- C. Client relationships that are profitable and energizing
- D. Core offer delivery that drives revenue

Correct Answer: B

LMS Logic: Firefighting and low-impact admin represent classic Time Leaks that should be stopped or delegated.

Question 4: What is the purpose of formally pausing a marketing channel on Day 6?

- A. To reduce marketing expenses permanently
- B. To focus resources on channels with proven ROI
- C. To eliminate all marketing except referrals
- D. To avoid trying new marketing approaches

Correct Answer: B

LMS Logic: The goal is strategic focus, not elimination. Pausing underperformers allows doubling down on what works.

Question 5: How will you know in objective numbers that your 90-day focus is working?

- A. By feeling less stressed
- B. By working fewer hours overall
- C. By hitting the specific metrics and targets defined on Day 9
- D. By having more free time

Correct Answer: C

LMS Logic: Success must be measured objectively through the defined metrics with numerical targets.

Module 2 Badge

Clarity Champion: Awarded upon submission of the verified 90-Day Focus Plan. Represents clear understanding of what drives the business and what to eliminate.

Module 3: Develop Systems

Module Overview

This 30-day sprint transforms identified workflows into documented, repeatable systems. Learners will create a 'Systems Playbook' containing 2-3 critical workflows that are mapped, simplified, and ready for delegation. This is the engine room of the O.R.D.E.R. framework.

Module Learning Objectives

- Select and prioritize critical workflows for systemization
- Define clear triggers, outcomes, and quality standards for each workflow
- Map processes into simple, followable step-by-step procedures
- Create practical checklists and templates for recurring tasks
- Assign ownership and establish metrics for system health
- Test systems with team members and refine based on feedback

Daily Breakdown

Phase 1: The Blueprint (Days 1-5)

Day 1 - Identify Critical Workflows:

- Review Module 2 results (revenue sources, stress points, bottlenecks)
- Identify where most revenue comes from
- Identify where most stress is generated
- Recognize where you remain the bottleneck
- Select top 3 workflows to systemize immediately

GATE: Workflow Selection - Exactly 3 workflow titles must be entered

Day 2 - Define Trigger → Done:

- For each workflow, define the Trigger (what starts it)
- Define the Desired Outcome (verifiable result)
- Define the Quality Standard (what 'done right' looks like)

GATE: Trigger/Outcome Definition - All three fields must be completed for each of the 3 workflows

Days 3-5 - Map the Steps:

- Draft step-by-step process for each workflow
- Keep language simple enough for a competent team member to follow
- Number each step sequentially
- Include decision points and expected durations where relevant

GATE: First Draft Submission - All 3 workflow maps must have at least 5 steps documented each

Phase 2: Simplification (Days 6-12)

Days 6-7 - The Essential Filter:

- Review all draft workflows
- Circle steps that are essential
- Mark unclear or extra steps with '?'

- Identify steps that can be combined
- Note steps that must be done by founder vs. can be delegated

 **GATE: Review Confirmation** - User must confirm they have reviewed and edited each draft

Days 8-9 - Build the Checklists:

- Convert refined steps into checkbox format
- Create clean, linear SOP documents
- Include space for notes and exceptions
- Add version numbers and dates

 **GATE: Checklist Upload** - Finalized checklists for all 3 workflows must be uploaded

Days 10-12 - Template Creation:

- Identify recurring parts of each workflow
- Create templates for emails, scripts, documents, forms
- Ensure templates are plug-and-play ready
- Create at least 1 template per workflow

 **GATE: Template Submission** - At least one template per workflow must be created and uploaded

Phase 3: Infrastructure (Days 13-20)

Days 13-14 - Assign Ownership:

- Assign Primary Owner for each system
- Assign Backup Person for each system
- Confirm owner is NOT the founder (unless absolutely necessary)
- Document responsibilities summary for each owner

 **GATE: Owner Assignment** - All systems must have named owners; at least 2 should be non-founder

Days 15-17 - The System Home:

- Decide where the playbook will live (Drive, Notion, ClickUp, etc.)
- Create folder structure for all systems
- Upload all SOPs, checklists, and templates
- Share access with relevant team members

 **GATE: Repository Link** - Valid URL to the shared system repository must be submitted

Days 18-20 - Metric Selection:

- Choose 1-2 health metrics per workflow
- Define specific targets for each metric
- Example: 'Invoices sent by Friday each week'
- Example: 'All new leads contacted within 24 hours'

 **GATE: Metrics Definition** - All 3 workflows must have defined metrics and targets

Phase 4: The Reality Test (Days 21-30)

Days 21-24 - Team Testing:

- Have team members run workflows exactly as documented
- Observe without intervening (unless catastrophe)
- Collect feedback: What worked? What was confusing? What took too long?
- Track actual completion times vs. expected

 **GATE: Test Notes Submission** - Detailed test run notes for all 3 workflows must be submitted

Days 25-27 - The Final Polish:

- Update checklists and templates based on feedback
- Fix gaps and clarify confusing steps
- Produce 'Version 1.0' documents
- Update version numbers and dates

 **GATE: Version 1.0 Upload** - Revised documents must be uploaded with version numbers

Days 28-30 - The Systems Index:

- Create master Table of Contents for all business operations
- List System #, Name, Owner, Location/Link
- Ensure all team members can access the index
- Celebrate completion of the Systems Playbook

 **GATE: FINAL MODULE GATE** - Systems Index must be submitted to unlock Module 4

Module 3 Final Assessment

Question 1: Why is defining a 'Trigger' for each workflow essential?

- A. To make the system longer
- B. So team members know WHEN to start the process without asking
- C. To create more documentation
- D. To satisfy audit requirements

Correct Answer: B

LMS Logic: A system fails if people don't know when to start. Clear triggers enable independent action.

Question 2: What is the minimum number of templates required for this module?

- A. 1 template total
- B. 1 template per workflow (minimum 3 total)
- C. 5 templates total
- D. Templates are optional

Correct Answer: B

LMS Logic: Each of the 3 workflows must have at least one template to ensure plug-and-play usability.

Question 3: Why should the Primary Owner ideally NOT be the founder?

- A. Founders are too expensive for operational work
- B. The goal is to create systems that run WITHOUT founder dependency
- C. Founders don't understand the work
- D. Founders should only do strategic work

Correct Answer: B

LMS Logic: The entire purpose of systemization is to remove founder as the bottleneck.

Question 4: What is the purpose of the team testing phase (Days 21-24)?

- A. To evaluate team member performance
- B. To identify gaps and confusion in the documented systems
- C. To justify the time spent on documentation
- D. To assign blame for errors

Correct Answer: B

LMS Logic: Testing reveals what the documentation missed. The goal is improvement, not evaluation.

Question 5: What should be included in the Systems Index?

- A. Only the most important system
- B. System number, Name, Owner, and Location/Link for all systems
- C. Just the names of all systems
- D. Only the founder's responsibilities

Correct Answer: B

LMS Logic: The index provides a complete map of who owns what and where to find it.

Module 3 Badge

Systems Architect: Awarded upon submission of the complete Systems Index. Represents successful creation of documented, tested, and owned business systems.

Module 4: Educate & Empower Teams

Module Overview

This 21-day sprint transitions operational control to the team so they can run systems without founder intervention. The focus shifts from creation to deployment, ensuring systems are understood, practiced, and owned by team members with clear decision-making boundaries.

Module Learning Objectives

- Articulate a compelling narrative for why systems benefit everyone
- Design and deliver effective team training sessions
- Assign clear roles and responsibilities with accountability
- Create feedback mechanisms for continuous improvement
- Define decision boundaries that empower without creating risk
- Establish sustainable weekly rhythms for system maintenance

Daily Breakdown

Phase 1: Align & Train (Days 1-7)

Day 1 - The 'Why' Narrative:

- Draft 2-3 sentence Vision Statement explaining the shift to systems
- Focus on benefits to team AND business (e.g., 'To reduce chaos so we can all leave on time')
- Avoid language that sounds like policing or micromanagement
- Prepare for team questions and concerns

GATE: Vision Statement - 2-3 sentence statement must be entered

Day 2 - The Training Plan:

- Schedule specific training session date and time
- Define who must attend
- Select 2-3 workflows to cover in training
- Prepare materials and walkthrough agenda

GATE: Calendar Confirmation - Screenshot or confirmation of scheduled training must be uploaded

Days 3-4 - Run the Training:

- Walk team through 'Trigger → Steps → Done' for each workflow
- Show exactly where SOPs and templates live
- Demonstrate how to access and use the playbook
- Record all team questions and concerns
- Allow hands-on practice during session

GATE: Training Notes - Session notes with team questions must be submitted

Days 5-7 - Assign Official Roles:

- Confirm Primary and Backup owners for each system
- Ask each owner: 'Do you feel clear on what done right looks like?'
- Ask each owner: 'What support do you need from me?'
- Document responsibilities summary for each role

 **GATE: Roles Table** - Completed table with all owners and their acknowledged understanding

Phase 2: Practice & Feedback (Days 8-14)

Days 8-10 - The Hands-Off Test:

- Let team run systems on real work
- Do NOT intervene unless catastrophe
- Log who ran which system and any issues
- Track pass/fail for each independent run

 **GATE: Pass/Fail Log** - Log entries for all systems tested must be submitted

Day 11 - The Feedback Huddle:

- Conduct 15-20 minute team huddle
- Ask: 'What's working well?'
- Ask: 'What feels confusing?'
- Ask: 'Where do you still need me?'
- Document all feedback without defending or explaining

 **GATE: Feedback Submission** - At least one piece of feedback must be entered to proceed

Days 12-13 - The SOP Upgrade:

- Edit checklists and templates based on huddle findings
- Fix gaps immediately while feedback is fresh
- Update version numbers (Version 1.1)
- Communicate changes to team

 **GATE: Version 1.1 Upload** - Updated playbook with tracked changes must be uploaded

Day 14 - The Win Log:

- Identify a specific 'System Win' to celebrate
- Examples: 'Fewer errors in Monday report', 'Faster client onboarding'
- Communicate the win to the entire team
- Reinforce the behavior you want to see more of

 **GATE: Win Documentation** - Description of celebrated win must be submitted

Phase 3: Empower & Stabilize (Days 15-21)

Days 15-17 - Set Decision Boundaries:

- Create Decision Matrix for each workflow
- Define what team CAN decide on their own
- Define when they MUST escalate to founder/manager
- Share boundaries clearly with all team members

 **GATE: Decision Matrix** - Completed matrix for all systems must be submitted

Days 18-19 - The Weekly Rhythm:

- Design 15-30 minute weekly meeting structure
- Agenda: Quick wins, Key numbers/metrics, Issues, Improvements
- Schedule recurring calendar invite
- Confirm attendance expectations

 **GATE: Calendar Invite** - Screenshot of recurring weekly meeting must be uploaded

Days 20-21 - The Next Steps Review:

- Answer: 'Where has the team stepped up most?'
- Answer: 'Where am I still too involved?'
- Decide which workflow to systemize or train on next
- Document lessons learned and adjustments needed

 **GATE: FINAL MODULE GATE** - Team Empowerment Audit must be submitted to unlock Module 5

Module 4 Final Assessment

Question 1: Why is the 'Why' Narrative essential before training the team?

- A. To justify the founder's decisions
- B. To prevent systems from feeling like policing rather than empowerment
- C. To create formal documentation
- D. To satisfy HR requirements

Correct Answer: B

LMS Logic: Systems fail when teams feel policed. A clear 'why' builds buy-in and reduces resistance.

Question 2: What should you do during the Hands-Off Test (Days 8-10)?

- A. Intervene at the first sign of trouble
- B. Observe without intervening unless there is a catastrophe
- C. Take over when mistakes happen
- D. Skip the test if you're busy

Correct Answer: B

LMS Logic: The test is meaningless if you intervene. Learning requires space to make and correct mistakes.

Question 3: What is the purpose of the Decision Matrix?

- A. To document all possible decisions
- B. To define what the team can decide vs. when they must escalate
- C. To limit team authority
- D. To create approval bottlenecks

Correct Answer: B

LMS Logic: Clear boundaries enable confident decision-making without constant founder involvement.

Question 4: Why celebrate a 'System Win' on Day 14?

- A. To make the team feel good
- B. To reinforce the behavior you want to see more of
- C. To mark the halfway point
- D. To compare with other teams

Correct Answer: B

LMS Logic: Recognition shapes behavior. Celebrating wins signals what success looks like.

Question 5: What belongs in the weekly meeting agenda?

- A. Only problems and issues
- B. Quick wins, key metrics, issues, and improvements
- C. Founder's announcements only
- D. A review of all systems every week

Correct Answer: B

LMS Logic: Balanced agendas maintain momentum (wins), accountability (metrics), and improvement (issues + fixes).

Module 4 Badge

 **Team Champion:** Awarded upon submission of the Team Empowerment Audit. Represents successful transition of operational control to the team.

Module 5: Replace Yourself & Review

Module Overview

This 30-day capstone project is where founders prove they have successfully extracted themselves from daily operations. The module focuses on redefining the founder role, establishing a 4-day work week, building monitoring dashboards, and mapping the path to a 2-day work week.

Module Learning Objectives

- Identify and protect the 3-5 highest-value activities only the founder can do
- Design and implement a sustainable 4-day themed work week
- Execute final delegation of tasks with proper handoff protocols
- Build a founder dashboard for managing by metrics rather than presence
- Establish weekly and monthly review rhythms for business oversight
- Create a roadmap from 4-day to 2-day work week in the business

Daily Breakdown

Phase 1: Redefine Role & Week (Days 1-7)

Days 1-2 - The 'Only You' Filter:

- List the 3-5 highest-value activities that ONLY you can do
- Examples: Big Vision, Key Partnerships, Major Client Relationships, Strategic Direction
- List current tasks someone else could do with training
- Be honest about what you're clinging to unnecessarily

 **GATE: Founder Value Audit** - List of 3-5 'Only You' tasks and delegated task list must be submitted

Days 3-4 - Draft the 4-Day Week:

- Select 4 work days and 1 non-work/rest day
- Assign a specific theme to each work day
- Examples: CEO Day, Sales Day, Delivery Day, Systems Day
- Protect the non-work day fiercely

 **GATE: Themed Schedule** - Complete themed week schedule with all days assigned must be submitted

Days 5-7 - Time Blocking:

- Create calendar grid for mornings, middays, afternoons, late afternoons
- Block time for Strategy/CEO work
- Block time for Key Relationships & Sales
- Block time for Review & Decisions
- Include buffer time and avoid over-scheduling

 **GATE: Ideal Calendar** - Screenshot of blocked calendar with all required time blocks must be uploaded

Phase 2: Handoff & Boundaries (Days 8-15)

Days 8-10 - The 'Stop Doing' List:

- Identify specific tasks to release in the next 90 days
- Name the new owner for each task

- Identify training needed for each handoff
- Set target handoff dates

 **GATE: Delegation Roadmap** - Complete delegation roadmap with owners, training, and dates must be submitted

Days 11-13 - The Handoff Plan:

- For each task: Show the system/SOP
- Do a run-through together
- Let them run it while you watch
- Then step back completely
- Document completion of each handoff

 **GATE: Handoff Confirmation** - Confirmation of scheduled handoff sessions must be submitted

Days 14-15 - Access Boundaries:

- Define when you ARE available for decisions (e.g., 11-12 and 3-4 on work days)
- Define when you are NOT available
- Create and share Communication Policy with team
- Examples: 'I check Slack only at 11am and 3pm'

 **GATE: Communication Policy** - Written policy shared with team must be uploaded

Phase 3: Dashboard & Reviews (Days 16-23)

Days 16-18 - The Founder Dashboard:

- Choose 5-7 key health metrics for the business
- Categories: Revenue/Pipeline, Delivery/Client Health, Team/Capacity, Cash/Profit
- Define data source for each metric
- Set target or healthy range for each metric
- Create simple tracking mechanism (spreadsheet or software)

 **GATE: Live Dashboard** - Link or screenshot of live founder dashboard must be submitted

Days 19-21 - The Review Rhythm:

- Schedule Weekly Review (30-60 minutes)
- Weekly Agenda: Review dashboard, Check key systems, Decide on 1-3 actions
- Schedule Monthly Review (60-90 minutes)
- Monthly Agenda: Review progress toward 2-day week, Assess team ownership, Adjust priorities

 **GATE: Review Calendar** - Calendar confirmations for both weekly and monthly reviews must be uploaded

Days 22-23 - The New Role Description:

- Write official 'Founder Role Description (Next 90 Days)'
- List what you ARE responsible for
- List what you are NO LONGER responsible for
- Sign and date the document

 **GATE: Role Description** - Signed founder role description must be submitted

Phase 4: Test & Lock In (Days 24-30)

Days 24-27 - The 4-Day Test Drive:

- Live the 4-day schedule for at least one full week

- Log planned vs. actual work days
- Note where you slipped back into old habits
- Document what felt good or freeing

 **GATE: Test Week Log** - Detailed log of the test week must be submitted

Days 28-29 - Adjust & Improve:

- Identify schedule leaks and fix them
- Identify system gaps and address them
- Update schedule and dashboard as needed
- Finalize the 4-day structure for the next 90 days

 **GATE: Final Adjustments** - Confirmation of adjustments made must be submitted

Day 30 - The 2-Day Roadmap:

- Define target date for achieving 2-day work week
- Map specific steps to move from 4 days to 3 days
- Map specific steps to move from 3 days to 2 days
- Sign the Freedom Commitment document

 **GATE: FINAL COURSE GATE** - Signed Freedom Commitment must be uploaded to earn certificate

Module 5 Final Assessment

Question 1: Which activities should appear on your 'Only You' list?

- A. All tasks you currently do
- B. 3-5 highest-value activities that uniquely require your expertise
- C. Tasks that generate the most revenue
- D. Tasks you enjoy the most

Correct Answer: B

LMS Logic: The 'Only You' list should be SHORT and focused on irreplaceable contributions.

Question 2: Why assign themes to each work day?

- A. To make the schedule look organized
- B. To create predictable focus and reduce context-switching
- C. To fill all available time
- D. To impress the team

Correct Answer: B

LMS Logic: Themed days reduce cognitive load and improve deep work by batching similar activities.

Question 3: What is the purpose of the Communication Policy?

- A. To reduce the founder's workload
- B. To set clear expectations about when you're available for decisions
- C. To avoid team questions
- D. To create hierarchy

Correct Answer: B

LMS Logic: Clear availability boundaries enable team autonomy while preserving founder focus time.

Question 4: How many key metrics should the Founder Dashboard track?

- A. As many as possible

- B. 5-7 key health metrics across business categories
- C. Only revenue metrics
- D. Just one metric

Correct Answer: B

LMS Logic: 5-7 metrics provide comprehensive visibility without overwhelming detail.

Question 5: What is the ultimate goal of the O.R.D.E.R. Framework?

- A. To work 4 days per week forever
- B. To achieve a 2-day work week in the business
- C. To eliminate all work
- D. To hire more employees

Correct Answer: B

LMS Logic: The 4-day week is a milestone on the path to a sustainable 2-day work week.

Module 5 Badge

Freedom Founder: Awarded upon submission of the signed Freedom Commitment. Represents successful extraction from daily operations and a clear path to the 2-day work week.

Certificate & Gamification System

Certificate Requirements

The 'O.R.D.E.R. Business Mastery Certified' credential is awarded only upon successful completion of all five modules and their respective gates. This is not a participation certificate—each gate must be passed with genuine work products.

Completion Criteria

- Module 1: Signed Schedule Commitment with verified 2+ hour weekly time gain
- Module 2: Verified 90-Day Focus Plan with defined metrics
- Module 3: Complete Systems Index with tested workflows
- Module 4: Team Empowerment Audit with decision boundaries
- Module 5: Signed Freedom Commitment with 2-Day Roadmap
- All module quizzes passed with 80% or higher score

Badge System

The O.R.D.E.R. Framework uses a progressive badge system to recognize achievement and maintain motivation throughout the course. Each badge represents mastery of a specific competency area.

Module Completion Badges

Badge Name	Icon	Earned Upon	Competency Represented
Time Master		Module 1 Completion	Personal time management and productivity fundamentals
Clarity Champion		Module 2 Completion	Strategic business analysis and prioritization
Systems Architect		Module 3 Completion	Process documentation and system design
Team Champion		Module 4 Completion	Team enablement and delegation
Freedom Founder		Module 5 Completion	Operational independence and strategic leadership

Achievement Badges (Optional)

Badge Name	Icon	Earned When	Encourages
Early Bird		Completing any module 2+ days ahead of schedule	Efficient progress
Perfectionist		Scoring 100% on any	Thorough learning

Badge Name	Icon	Earned When	Encourages
		module quiz	
Streak Keeper		Logging in 10 consecutive days	Consistent engagement
Helper		Providing feedback that improves the course	Community contribution
Overachiever		Exceeding time gain targets by 50%+	Exceptional results

Final Certification Badge

Upon earning the O.R.D.E.R. Business Mastery Certified credential, learners receive a special certificate badge that can be displayed on LinkedIn and professional profiles. This badge represents the culmination of approximately 101 days of structured learning and implementation.

Gamification Elements

Progress Visualization

- Linear tunnel visualization showing progress through each module
- Daily task completion checkmarks
- Module progress bars (only unlock next when complete)
- Badge collection gallery

Motivational Elements

- Celebration animations when gates are passed
- Progress emails at key milestones (25%, 50%, 75%, 100%)
- Comparison with average completion times (optional)
- Certificate countdown as final gate approaches

Social Elements (Optional)

- Community discussion forums per module
- Optional peer review of submitted work
- Success story sharing
- Alumni network access upon certification

LMS Implementation Notes

The following technical recommendations ensure the gated tunnel architecture functions correctly:

- Gate Validation: Each gate should validate that required fields are not just filled, but contain meaningful content. Use data type validation for numerical fields and minimum length requirements for text fields.
- Progress Persistence: Save progress automatically after each day's tasks. Users should never lose work due to session timeouts or navigation errors.
- Mobile Responsiveness: Daily tasks should be completable on mobile devices for busy entrepreneurs who may need to work on the go.

- File Upload Support: Several gates require document uploads. Ensure the LMS supports PDF, image, and document file types with reasonable size limits.
- AI Gatekeeping: Consider AI-generated recommendations to analyze user submissions and flag 'at-risk' areas before progression.

This document provides complete specifications for implementing the O.R.D.E.R. Framework as a gated LMS course. Each module, gate, assessment, and badge has been designed to ensure learners achieve genuine transformation rather than passive content consumption.
